

Product data sheet

Item number: 652010

Support bracket CG-TH

in connection with separating profiles, for absorbing the shear forces of greened and gravelled roofs

Technical data

Material	stainless steel
Dimensions	Upstand: approx. 90 mm Width: approx. 70 mm Length: approx. 400 mm
Nominal thickness	approx. 4 mm
Weight	approx. 1,4 kg/each
Load capacity	shear capacity: max. 1,5 kN/piece
Processing	Must be force-fitted to the roof construction with 3 screws
Delivery form	Depending on order size
Delivery weight	according to order quantity
Storage	Dry

Suggested tender text:

ClimaGrün support bracket CG-TH in connection with separating profiles, for absorbing the shear forces of greened and gravelled roofs, with the following properties:

Material Inox, upstand approx. 90 mm, width approx. 70 mm, length approx. 400 mm, nominal thickness approx. 4 mm, weight approx. 1,4 kg/each, must be friction-locked to the roof structure via 3 screws, supply and install professionally
